

## **SUMMARY OF REVISIONS FOR VERSION 1.1 OF THE BUSINESS PROCESS DESCRIPTION**

### **1. Introduction**

The Business Process Description (BPD) describes and illustrates the business processes involving CSDs, Central Banks and other technically directly connected parties and their interaction with T2S. Following the publication of BPD v.1.0 in November 2011 the T2S Programme Office publishes a yearly update of the BPD in order ensure the alignment of the BPD with T2S specifications and documentation of market practices (e.g. outcomes of harmonisation work).

### **2. Summary of revisions for BPD v.1.1**

For the current version of the BPD (v.1.1) the Change Requests which were approved since the publication of BPD v.1.0 (November 2011) and the updated UDFS v.1.2.1 served as the basis for revisions. The respective process descriptions were updated to mirror the current T2S specification. Not all Change Requests lead to revisions, since some of them referred to a level of detail beyond that of the BPD. In addition, the references to the UDFS and messages were updated.

In addition, a few minor insights of the Task Force on Adaptation to Cross-CSD settlement (TFAX) on the use of T2S functionality in the context of selected business process were incorporated into the BPD.

### 3. List of revisions

No.	Change Description	Reference
1	Maintenance of Cross-CSD Settlement Link and Securities Eligibility [T2S.BPD.STDA.MCSL]: Restriction regarding future date removed for creation; clarification added to preconditions	CR T2S_0277_URD
